VASARA Collection

With typical arcade gameplay, **VASARA** uses a two-button system for attacking. The primary attack involves rapidly pressing the first button which will fire regular bullets. Each character also has a melee attack that can be used by holding the button down. The melee attack will not only damage an enemy, but also deflect any bullets in the way.

The second button is used to deploy a bomb which destroys small enemies, while damaging larger ones.

The third method of attack uses a meter called "VASARA" meter. Once the VASARA meter is full it can be used by holding down the primary attack button for a small amount of time and then releasing it. The VASARA attack is a larger version of the melee attack which does large amounts of damage. The VASARA meter can be replenished by collecting various items dropped by the enemies, such as red jewels.
